Kalshi Partners with U.S. Black Chambers to Expand Risk Management Resources for Black-Owned Businesses

New partnership aims to equip Black entrepreneurs with financial education, hedging tools and strategies to navigate economic uncertainty.

NEW YORK — October 13, 2026. Kalshi, a federally regulated financial exchange, has announced a partnership with the U.S. Black Chambers, Inc. (USBC) to expand risk-management education and financial resources for Black-owned businesses. The initiative brings together Kalshi's event-based financial markets and USBC's network of more than 145 chambers and business organizations, representing approximately 326,000 Black businesses across 42 states.

Helping Businesses Navigate Uncertainty

Black-owned businesses play an increasingly important role in the nation's economy, with their numbers reportedly growing by 62% in recent years. Yet many continue to face challenges involving access to capital, inflation, supply chain disruptions and unexpected economic events. Federal Reserve research has also highlighted obstacles Black-owned small businesses may face recovering from natural disasters and securing immediate relief.

Through this partnership, Kalshi and USBC plan to introduce entrepreneurs to financial strategies designed to address some risks beyond their control. Kalshi's event contracts allow participants to take positions based on outcomes such as weather conditions and economic indicators. For example, a tour operator dependent on favorable weather might use a weather-related contract to offset some lost revenue when rain causes cancellations.

Education and Technical Assistance

The partnership will feature interactive workshops for chamber members and entrepreneurs. Participants will learn to identify business risks, understand hedging strategies, evaluate event contracts and develop risk-management plans suited to their budgets.

USBC President and CEO Ron Busby Sr. welcomed the collaboration as part of the organization's mission to connect Black entrepreneurs with emerging markets, business resources and economic opportunity. Kalshi co-founder and CEO Tarek Mansour emphasized that smaller businesses should have access to tools traditionally associated with large corporations.

Opportunity Requires Financial Literacy

Access to sound financial information can be as important as access to capital. This partnership could broaden entrepreneurs' understanding of financial planning and business resilience. Event contracts, however, carry risks: a hedge may not match actual losses, and participants can lose the money committed to a position. Responsible education must therefore address contract costs, limitations and potential losses alongside possible benefits.

MCW Editorial Perspective

Minority Commerce Weekly recognizes the importance of initiatives that strengthen the competitiveness, sustainability and economic participation of minority-owned businesses.

Since March 1988, MCW has connected minority-, women-, disadvantaged- and service-disabled veteran-owned businesses with procurement opportunities and information supporting their growth. Access to public contracts and private-sector subcontracting remains essential, but lasting success also depends on financial education, responsible management and resilience.

The measure of this Kalshi-USBC initiative will be whether entrepreneurs gain practical knowledge, understand the financial risks involved and are better prepared to sustain their businesses. MCW encourages interested business owners to follow forthcoming announcements about educational workshops. Further programming details are expected in the coming months.
