DORMITORY AUTHORITY OF THE STATE OF NEW YORK ("DASNY")

NOTICE TO BIDDERS

RFQ#7624 - Westchester County RTA - Design-Build Services

DASNY issues this Request for Qualifications (RFQ) seeking a responsive Statement of Qualifications ("SOQ") from qualified Design-Build entities or teams ("Design-Build Team" or "Team") capable of providing all Work (as defined herein) necessary for the design and construction of a new Secure/Specialized Secure Youth Detention Facility located in Westchester County (the "Project").

Following receipt of the submitted SOQs, an established Evaluation Committee will then identify a shortlist of Design-Build Teams that will continue with the development process for the Project. The shortlisted Teams will be provided with a future Request for Proposal ("RFP") that will include the Bridging Documents for the overall Project on which to fully develop a response to the RFP.

Project Background

Summary of NYS Mandate:

Per the New York State mandate "Raise the Age" (RTA) issued on April of 2017, 16 and 17 year-old felons are to be removed from the adult population in Jails and be housed separately in existing Juvenile Detention Facilities under a separate new category called "Adolescent Offenders", or "AOs". The deadline for 16-year old's transition was October 1, 2018, and the transition deadline for 17-year olds was October 1 st, 2019. The state has encouraged all counties to make joint provisions utilizing existing facilities by modifying them accordingly to the new regulations known as subpart 180-3 of 9 NYCRR. The New York State Office of Children and Family Services (OCFS), in conjunction with the New York State Commission of Corrections (SCOC) are responsible for the regulatory and budgetary oversight of the program. Subpart 180-3 entitled "Specialized Secure Detention Facilities", spells out the exact requirements of the new AO category from administrative and operation to physical plant requirements. The state will reimburse counties 100% for RTA facility improvement costs, including planning.

Westchester County Proposal to Meet the RTA Mandate:

Up until now, Westchester County has been sending overflow Adolescent Offenders to other facilities throughout the state that are able to provide the appropriate housing. However, the high cost and inconvenience factors have necessitated the need for a larger regional facility. With the State's support, Westchester County has been granted considerations to design and build a new facility on the grounds of its existing Woodfield Cottage Facility located at 20 Hammond House Road, Valhalla, NY 10595. The new facility will contain a maximum of 80 beds for youth. The youth correctional facility design shall encourage rehabilitation by focusing on juvenile correctional facility design principles that are restorative, such as daylighting and calming acoustics which create spaces in which young people can thrive. It is assumed that the facility will serve male and female youths subject to detention by Family Court or an Adolescent Court Judge, including Juvenile Delinquents (JD), Juvenile Offenders (JO) and Adolescent Offenders (AO).

Overview

The new Westchester County Secure/Specialized Secure Youth Detention Facility will replace the current inadequate detention infrastructure of the existing Woodfield Cottage Facility and expand the capacity to securely house up to 58 youth and expandable to up to 80 youth in the future, including the "Raise the Age" (RTA) youth population. The project should comply with all regulations for secure youth detention facilities and meet goals for normative, restorative environment. The project should also comply with all relevant codes for building design and construction including local building code as well as state and federal regulations for stormwater or other considerations.

It should be noted that the existing Woodfield Cottage facility will remain in full operation during construction of the new youth detention building. The Design Builder will be responsible for maintaining secure separation between construction areas within the active facility during all stages of construction. Once the new facility is completed, youth will be transferred to the new build-

ing and demolition of the old building will begin. Once demolition is complete, outdoor recreation facilities and parking lots will be constructed for the new facility.
