EXHIBIT A

(Scope of Work)

Overview

The Public Space and Streetscape Framework (the "Framework") seeks to build upon Battery Park City's existing assets. These include more than 36 acres of parks, high-quality programming and operations, a robust public art collection, and a vibrant mix of cultural, educational, retail, recreational, commercial, and residential uses.

Because the NWBPCR Project will affect the public realm for several years, the Framework should also identify public-realm improvements that can be implemented quickly, lawfully, and visibly during construction while the longer-term capital planning process proceeds.

The Framework will examine opportunities to strengthen and expand the public realm across the neighborhood. Areas of focus shall include placemaking and public art, enhanced landscaping along the streets (not just in parks), improved connectivity to Lower Manhattan, street redesigns that expand usable public space and support local retail, improved pedestrian safety (particularly around neighborhood schools and key access points), and short-term interventions that can improve quality of life, public-space access, shade, safety, and retail vitality.

The Framework will yield a set of immediate-, short-, medium-, and long-term projects that together will inform BPCA's five-year Capital Planning Strategy, with clear priorities and actionable recommendations for projects that can advance immediately.

The goals of the Framework are to:

1. Build on Battery Park City's reputation as a neighborhood with a world-class park system by identifying new opportunities for green and open space.
2. Enliven neighborhood streets and public spaces equitably through placemaking, public art (including functional artworks), amenities, programming, shade, seating, and/or resident-serving uses.
3. Identify priority intersections and neighborhood access points and develop context-specific safety improvements, particularly at neighborhood entrances, around schools, along senior and family routes, and with input from senior residents and other stakeholders.
4. In coordination with city and state partners, improve public spaces and pedestrian safety along West Street, transforming it from a perceived barrier in some places into a vibrant public realm.
5. Re-envision the potential design and layout of underutilized spaces, including Little West Street, South End Avenue and other rights-of-way, street ends, cul-de-sacs, pedestrian bridges, the North End Avenue median, and the Murray Street Triangle.
6. Strengthen physical and visual connections to neighboring assets such as Hudson River Park, The Battery, and those across 9A such as the World Trade Center site.
7. Highlight and better integrate key BPCA assets - including the Ballfields, 200 Rector Street, 6 River Terrace, Wagner Park, the esplanade - by improving access, ground-floor visibility, and adjacent public spaces.
8. Implement short-term strategies that improve quality of life, public-space access, shade, safety, and retail vitality during the multi-year resiliency build-out.
9. Use tactical urbanism, urban prototyping, and other approaches to test interim improvements before committing to permanent capital investments.
10. Engage members of the public and local stakeholders throughout the process to better understand neighborhood priorities, gain consensus around

proposed improvements, and build a foundation for continuing governance and stewardship into the future.

Scope of Work/Task Summary

Scope of Work/Task Summary

Task 1: Existing Conditions and Problem Definition

The Consultant team will synthesize relevant existing work provided by BPCA, including prior studies, plans, available neighborhood data, BPCA's Strategic Plan, BPCA sustainability and tree-canopy work, NWBPCR planning documents, community comments, and other relevant public-realm and resiliency documents.

This task will include an assessment of physical conditions, public-space use, open-space access, connectivity, safety, construction phasing, shade and urban heat conditions, tree canopy and replacement conditions, local retail visibility and access, school and senior routes, ADA/accessibility, property ownership and jurisdiction, and permitting or environmental-review constraints. The task should conclude with a refinement of key challenges and opportunity areas, including a map of locations where immediate, low-regret interventions may be feasible.

Deliverables: an Immediate Opportunities Memorandum (identifying candidates for quick-win projects including, for each project, required approvals, likely cost bands, maintenance obligations, and SEQR/NEPA or other environmental-review considerations for staff review) and existing conditions assessment/refinement of problem statements

Task 2: Priority Concepts and Precedent Analysis

Building on Task 1, the Consultant will identify priority ideas and develop a concept-level framework for identifies immediate (0-6 months), short-term (6-18 months), medium-term (18-36 months), and long-term (36+

months) public space and streetscape improvements. The Consultant should develop a tactical-urbanism strategy that allows BPCA to test potentially reversible design ideas, gather user feedback, and refine long-term capital recommendations.

This task will include a review of relevant precedents from New York City and comparable urban contexts, with an emphasis on strategies that have successfully enhanced public life, safety, and neighborhood connectivity.

Deliverables: Precedent Analysis and Draft Public Space and Streetscape Framework (this will serve as the draft for the Final Task 4 deliverables)

Task 3: Community Engagement

Create a Community Engagement Plan to better understand neighborhood priorities and build consensus around proposed improvements. Strategy may include public meetings, workshops, pop-up outreach, surveys, and/or stakeholder interviews. Consultant shall synthesize feedback received in order to inform refinement of concepts and priorities.

Deliverable: Community Engagement Summary and Materials

Task 4: Implementation Strategy and Cost Estimation

The Consultant will develop a phased implementation strategy for the P Framework that identifies immediate (0-6 months), short-term (6-18 months), medium-term (18-36 months), and long-term (36+ months) projects.

Consultant should include high-level cost estimates with the priority recommendations, along with guidance on sequencing and near-term actions to deliver improvements quickly.

For each identified project, the implementation strategy should include a summary of: project purpose, location, property owner or jurisdiction, required agency coordination, permit requirements, preliminary SEQR/NEPA or other environmental-review considerations, capital and operating cost bands, maintenance owner and requirements, accessibility implications, emergency-access implications, construction-phasing dependencies, community-benefit rationale, and performance metrics as relevant.

The final implementation plan should build on the draft Framework delivered as part of Task 2 and include an implementation matrix detailing the above, the Summary of Community Engagement Efforts from Task 3, and a public-facing dashboard and metrics, such as square feet of recovered public space, number of crossings improved, or number of shaded seats added.

Deliverables

Please insert these Deliverables into the Proposed Schedule:

1. Immediate Opportunities Memorandum
2. Existing conditions assessment and refinement of problem statements
3. Precedent Analysis
4. Draft Public Space and Streetscape Framework
5. Community Engagement Summary and Materials
6. Implementation Strategy & Prioritization Matrix
7. High-level cost estimates for priority projects
8. Final framework report and presentation materials, including findings and recommendations and next-step planning and implementation
