The base of this project is the removal & abatement of the existing asbestos-positive vinyl tile within the Ranger School and its replacement. There are 4 alternates on the project, each expanding the scope of the project within the building to include additional non-asbestos containing flooring products. Project will require coordinated phasing to allow continued building occupancy over the course of construction.

It is the policy of the State of New York and the State University of New York to encourage minority business enterprise participation in this project by contractors, subcontractors and suppliers, and all bidders are expected to cooperate in implementing this policy.

The State University of New York reserves the right to reject any or all bids.
