DEFINITION OF GOOD FAITH EFFORTS

5 NYCRR §142.8 - Contractor's good faith efforts

(a) The contractor must document its good faith efforts toward meeting certified minority- and women-owned business enterprise utilization plans by providing, at a minimum:

1. Copies of any solicitations of certified minority- and/or women-owned business enterprises listed in the New York State Directory of certified businesses, and any responses thereto;

2. If responses to the contractor's solicitations were received, but a certified minority- or woman-owned business enterprise was not selected, the specific reasons that such enterprise was not selected;

3. Copies of any advertisements for participation by certified minority- and women-owned business enterprises timely published in appropriate general circulation, trade and minority- or women-oriented publications, together with the listing(s) and date(s) of the publication of such advertisements;

4. The dates of attendance at any pre-bid, pre-award, or other meetings, if any, scheduled by the State agency awarding the State contract, with certified minority- and women-owned business enterprises which the State agency determined were capable of performing the State contract scope of work for the purpose of fulfilling the contract participation goals;

5. Information describing the specific steps undertaken to reasonably structure the contract scope of work for the purpose of subcontracting with, or obtaining supplies from, certified minority- and women-owned business enterprises.

(b) In addition to the information provided by the contractor in paragraph (a) above, the State agency may also consider the following to determine whether the contractor has demonstrated good faith efforts:

1. Whether the contractor submitted an alternative utilization plan consistent with the subcontract or supplier opportunities in the contract;

2. The number of certified minority- and women-owned business enterprises in the region listed in the directory of certified businesses that could, in the judgment of the State agency, perform work required by the State contract scope of work;

3. The actions taken by the contractor to contact and assess the ability of certified minority- and women-owned business enterprises located outside of the region in which the State contract scope of work is to be performed to participate on the State contract;

4. Whether the contractor provided relevant plans, specifications or terms and conditions to certified minority- and women-owned business enterprises sufficiently in advance to enable them to prepare an informed response to a contractor request for participation as a subcontractor or supplier;

5. The terms and conditions of any subcontract or provision of suppliers offered to certified minority- or women-owned business enterprises and a comparison of such terms and conditions with those offered in the ordinary course of the contractor's business and to other subcontractors or suppliers of the contractor;

6. Whether the contractor offered to make up any inability to comply with the certified minority- and women-owned business enterprises goals in the subject State contract in other State contracts being performed or awarded to the contractor; and

7. Any other information that is relevant or appropriate to determining whether the contractor has demonstrated a good faith effort.
Louis Correa has been working since he was 8 years old instilling in him a hustle mentality that keeps him working tirelessly at 72. He says he worked to help his mother provide for his family, including his 27 uncles and aunts coming to live with them, consecutively, in America for better work and living opportunities.

“By the time I was 12 years old, I could drive. I was always mechanically inclined with my hands, so I would buy cars, fix them, then sell them,” Correa says. “I was never afraid of hard work.”

Correa founded Luz Electric in 2003, a business dedicated to providing comprehensive and safe services to clients in The Bronx, Manhattan, Queens, and Brooklyn. Luz Eletric’s eight electricians and project managers bring over 40 years of experience in electrical wiring and communication systems. They also specialize in housing projects, industrial facilities, and HVAC control system repairs.

“You are in competition with yourself, all of the contractors I know, aren’t doing what we are doing so they aren’t my competition.” Correa says. “We are very diversified in our work. We specialize in control work, control wiring, and many companies don’t do that, they don’t know how.”

Correa also says his family business specializes in service calls and repairs, as opposed to other electrical companies that solely do installations, which come at an extra cost.

Working for the Bronx community for 20 years, Correa says the most rewarding aspect of his job is being able to see the employees he has trained become successful and build lives for themselves and their families.

“When you see your employees go and buy million-dollar houses, we did something right,” Correa says. “It is very gratifying to see. I am happy to provide the salaries they are making and see them move out of a one-bedroom apartment, get married, have kids- and this is almost all of my employees.”

One of Luz Electric’s first and most important clients was Lemle and Wolff Companies, a real estate management business founded in 1938 with an aim to preserve neighborhood housing and reduce distressed properties. Correa’s business, just before the COVID pandemic, received a 1.2 million dollar contract for a “gut-rehab” of 89 apartments in which they essentially removed all fixtures and materials to build everything back to better restoration.
Luz has also done work for the public swimming pool, Highbridge Pool in Washington Heights, and many public libraries including the Saratoga Library and George Bruce Public Library, and HVAC control repairs for CUNY Medgar Evers College and Manhattan Theatre Club. He is currently working on two schools in the Bronx, P.S. 184 and P.S. 155, both for cameras and security systems installations.

“We are proud of all our jobs, every job we do, we try and do the best job we possibly can,” Correa said. “Right now, we have a really good crew and I can put them up against anybody and we are proud of that, me, my son, and my daughter.”

Correa credits Salsa Catering, another Manhattan MBDA client of over 10 years, for bringing the federal agency to his attention. Before reaching out to Manhattan MBDA, Correa took a course through BOC Capitol, MBDA’s loaning agency, that taught information on bookkeeping, payroll, and managing an office roughly eight years ago. When reaching out to MBDA Manhattan Managing Director Roxanne Neilson, Correa says he was looking for more job opportunities to not only increase revenue but to gain confidence from his employees.

“Since reaching out, I’ve been called a few times already from businesses such as Concigli Construction, and Tough Leaf and I have been able to bid on a few jobs because MBDA would send them to me,” Correa says.

Correa is looking forward to retirement to focus on taking care of his wife and mother, both living with dementia and to give his two kids a chance to take over. He says his children have begged him to stop working, that it is time for him to pass on the reigns and move on.

“Out of my siblings, I am the only one in New York. I receive help from my two nieces, but that’s it. I have to take care of my mother—that’s something I will never stop doing and I got to take care of my wife,” Correa explained. “I’d also like to travel before my wife gets worse, see every single state. Set up my SUV and go cross country, that’s something she’s always wanted.”

For those looking to get into the electrical industry, Correa advises they work hard, be honest with their customers, and keep their promises to their customers.

“It’s not always about money and sometimes you have to do things for free,” Correa says. Words Correa continues to live by himself by donating services during the COVID pandemic, and after, to the elderly.

“I’ve helped everyone who’s come my way. When you’re working it’s not just about you, there are going to be people in need.”

WDF supports hiring Section 3 of the Housing and Urban Development (HUD) mandate that requires employment and other economic opportunities generated by federal assistance to public housing authorities to be directed, whenever possible, to public housing residents and other low and very low-income residents to work on all of our New York City Housing Authority (“NYCHA”) projects. WDF supports hiring Resident Employment Program (REP), which requires that 15 percent of the labor amount of NYCHA construction contracts greater than $500,000 be spent on resident hiring. To that end, WDF’s approach to meet NYCHA Section 3 requirement and our past Section 3 performance has been to commit to working with Resident Economic Empowerment Sustainability Department (REESE) to source Category 1 and 2 residents.
